

BLACKARAT

SIZING GUIDE

BRACELETS:

To measure your wrist, you can:

Use a measuring tape. Wrap it around your wrist so it hangs the way you want to wear your BLACKARAT bracelet. Take note of the number at the point where tape measure reaches the 0 mark. To ensure that the bracelet is comfortably adjusted to your wrist, add 1.5 cm to the result obtained. Later, you can add or subtract centimetres depending on if you prefer a loose or tight fit. Select the bracelet size that is closest to the measurement taken. If your measurement is not in stock, we can manufacture it without problem.
